Hurricane Michael Information

The management and operation teams have been tracking and preparing for Hurricane Michael. Although, Hurricane Michael's current path is forecast to track west of Tampa, we do believe there is a chance Tampa will experience some heavy rains and potentially tropical storm winds. And as always, the track can change and we should be prepared as best as possible. Home builders have been notified to clean up their job sites prior to any impact Florida may receive from the storm. Street drain and inlet covers are to be pulled ahead of the storm by the builder's subcontractor.. The Asturia Amenity Center is also being prepared early for possible storm conditions, however, currently no closures are planned but we will continue to assess the forecast and implement closure if necessary. We have put together the attached; please click here for [detailed information](#).

Also here is a direct link to the NOAA site for continuing tracking of Hurricane Michael: <http://www.noaa.gov>. Additional information can also be obtained from Pasco County Office of Emergency Management at (727) 847-8137 or "MyPasco" phone app for direction about evacuation, preparation and updates on Hurricane Michael or at: <http://www.pascocountyfl.net/Index.aspx?NID=365>. Please do not contact Asturia or the CDD in an emergency situation, please contact 9-1-1 or the Pasco County Office of Emergency Management.

Please do not reply to this email as it will be sent to an unmonitored account. Please visit <http://www.AsturiaFlorida.com> for additional information. Thank you!
